PROJECT INFORMATION

therecleague.ca has an existing website hosted by Wix. We use the wix studio/bookings integrations..

We would like to set up a new structure for credit packs (used to book sports and events) and sunset the existing plans in a way that minimizes impact to our members.

All existing plans need to be audited to ensure members have plans that work with our current booking system.

General functionality, font, layout fixes to website.

Prefer to hire someone in the St Thomas or London Ontario areas.

Could lead to other projects.
